

Say hello to the **NEW OPTIM<sup>®</sup> Blue.**  
Bye-bye to viruses, TB, bacteria and fungi.

Virucidal. Bactericidal. Tuberculocidal and Fungicidal. OPTIM<sup>®</sup> Blue disinfecting wipes & liquid kill germs on surfaces fast – up to 10 times faster than other leading disinfectants. OPTIM Blue cleans and disinfects using Accelerated Hydrogen Peroxide<sup>®</sup> (AHP<sup>®</sup>) that has virtually no odor. Also, the active ingredient readily biodegrades into water and oxygen after disinfection. So OPTIM Blue is eco-friendly, gentle and easier on people. In fact, it's really only germs that aren't too fond of it.

## OPT/IM BLUE – LEADING EDGE TECHNOLOGY

OPT/IM BLUE surface cleaner and disinfectant is formulated with AHP (Accelerated Hydrogen Peroxide), a revolutionary, new patented disinfection technology.

Unlike other disinfectants OPT/IM BLUE is not based on phenols, alcohols, aldehydes, chlorines or quaternary ammonium compounds (quats). OPT/IM BLUE is recognized as a more responsible disinfectant cleaner for your patients and staff with its superior environmental and safety profile.

AHP combines a low level of hydrogen peroxide (0.5%) with other commonly used ingredients with superior safety profiles to form a synergistic blend, which exhibits exceptional potency as a germicide and performance as a cleaner. These claims are all backed with governmental registrations and extensive third party testing.

### OPT/IM BLUE WIPES

The OPT/IM BLUE wipes feature a special superior quality design, with a unique, non-woven bond pattern and uniform pore size. This ensures that the liquid is present on the substrate rather than being absorbed.

#### The result:

- The liquid is deposited onto the surface instead of staying inside the wipe or at the bottom of the canister.
- Wipes remain thoroughly wet and do not dry out quickly so contact times are met.
- Durable and strong with no lint residue.
- Capable of covering a large area with minimal wipe use.
- Economical consumption with less waste.

### OPT/IM BLUE MICROBIOLOGICAL EFFECTIVENESS

	TEST ORGANISM	CONTACT TIME
<b>VIRUCIDE</b>	Poliovirus type 1, Adenovirus type 5, Murine Parvovirus VR-1346	1 Minute
<b>BACTERICIDE</b>	Staphylococcus aureus, Enterococcus hirae, Pseudomonas aeruginosa	1 Minute
<b>TUBERCULOCIDE</b>	M. terrae	6 Minutes
<b>FUNGICIDE</b>	Candida albicans	10 Minutes

### YOUR OPT/IM-AL CHOICE IN INFECTION CONTROL

**CLEANER** – It cleans and disinfects in one step.

**FASTER** – OPT/IM BLUE disinfects a broad spectrum of organisms with short contact times (including Polio virus in 1 min).

**SAFER** – Does not contain VOCs (Volatile Organic Compounds) and is non-irritating to eyes and skin.

**ENVIRONMENTALLY FRIENDLY** – H<sub>2</sub>O<sub>2</sub> decomposes to water and oxygen.

### ORDERING INFORMATION

#### OPT/IM Blue Wipes:

OPTEUBlue-12W OPT/IM Blue ready-to-use Wipes; unscented; 160 sheets, 17.1 cm x 15.3 cm (1 case: 12 x 160 sheets)

#### OPT/IM Blue Liquid:

OPTEUBlue-4X4 OPT/IM Blue unscented, 4L (1 case: 4 x 4L)
